

Thelnetham Windmill 10.8.21

Thelnetham windmill stands on the edge of Thelnetham Fen. Dating from 1819, it is one of only four preserved tower mills in Suffolk. It was visited by Hoxne heritage group on August 10th 2021. Whilst there, on the ground floor a number of compass drawn circles (Hexafoils and simple circles) approximately 12cm in diameter were noted on the beams on the ground floor near the door. Within the hexafoils were a number of small (4mm diameter) circular stamps.
